What should I prepare ?

Please note that there is no official poster format. You may use an interactive poster in spite of a static poster, such as a slide show or videos. You may prepare any document (powerpoint slides, videos, images, etc.) you want to be able to present your works in few minutes in front of a webcam. Our advice is to prepare 3 slides describing, the objective of your work, the methodology and the results and to have some more multimedia documents to answer to questions.
